POLICY

The St Patrick’s College Community is a Gospel Community. We are committed to being proactive and welcoming especially to those who are disconnected from society.

We are challenged as Catholics to be innovative in supporting students who live on the margins of our society and/or out-of-home in terms of their learning outcomes. This includes, but is not restricted to, students who are socio-economically poor.

IMPLEMENTATION

- To work with the wider Catholic Community eg. the Parish to identify and support students at the margins
- To provide positive behavior support processes for students with high complex needs eg. work through pastoral structures such as the Counsellor, House Co-ordinator and if necessary outside providers
- To work with these structures to provide flexible curricular structures and programs
- To provide support regarding basic standard of living issues eg. housing, clothing, food
